Birgit Mazur takes over international sales at Northrail GmbH

Northrail, the Hamburg-based rail vehicle leasing and asset management company, is pleased to announce the appointment of Birgit Mazur as the new Head of Sales International. As of September 3, 2024, she will be responsible for the expansion of the international business.

Hamburg, September 11, 2024 – Birgit Mazur has more than 20 years of experience at international and market-leading railway companies. She has held a number of senior management roles in the railway industry, including at Captrain and Siemens Mobility, where she has demonstrated extensive expertise in business development and strategic sales at an international level.

“We have already significant market penetration in Germany. Now it is time to expand into selected European markets to further strengthen our international presence,” says Michael Trentzsch, Chief Investment Officer and Chief Commercial Officer at Northrail AG. “With Birgit Mazur, we are gaining a proven expert who, together with her team, will drive forward our international expansion.”

While Birgit Mazur will focus on expanding into new European markets, Danny Müller-Dröge will continue to manage sales activities in the German-speaking countries as Head of Sales DACH. This new strategic division will enable Northrail to further consolidate its existing markets and open up new opportunities in Europe.

“I am eager to play an active role in developing Northrail's international sales strategy and expanding our market share in selected European markets,” says Mazur. “The potential in these markets is very promising and I am confident that together with the entire Northrail team we will achieve great success.”

About Northrail

Northrail, headquartered in Hamburg, Germany, is a leading leasing provider and asset manager of rolling stock in Europe. Northrail manages a portfolio of currently around 450 locomotives, multiple unit trains and passenger coaches for freight and passenger transport in Europe with an investment volume of 1,5 billion euros. In addition, Northrail develops and structures innovative railway investments for and with international partners and institutional investors. The fleet under Northrail's management includes traditional shunting and universal locomotives as well as state-of-the-art electric and hybrid locomotives and battery-electric regional trains. In addition, Northrail develops tailor-made rental services for its customers and organises the maintenance of the vehicles.
